

- 2. A peptide [that comprises]comprising a modified tandem GnRH decapeptide sequence which allows for a testosterone level that is essentially non-detectable after vaccination with the peptide in a suitable dosage.
- A peptide according to claim 1[ or 2 that comprises]comprising at least two coupled GnRH decapeptide sequences[, optionally coupled through a spacer], wherein at least one of the amino acids of said coupled GnRH decapeptide sequences is replaced by a different amino acid.
  - 4. A peptide according to claim 1[, 2 or 3], wherein [the]said different amino acid is
- 5. A peptide according to claims 1[-4] wherein [the]said peptide is selected from the group consisting of:

SEQ ID NO: 5, SEQ ID NO: 6, and SEQ ID NO: 7.

- A peptide according to claims 1[-5] that is dimerised.
- 7. A peptide according to claim 6, conjugated with a carrier compound.
- 8. A peptide according to claim 7, wherein [the]said carrier compound is a protein.
- 9. A peptide according to claim [7 or ]8, wherein [the]said carrier compound is ovalbumin.

Attorney Docket: 4518US

Ant'd

The second secon

- A vaccine comprising a peptide in accordance [to any of]with claim[s] 1[-9].
- 11. A vaccine according to claim 10, [additionally] further comprising an adjuvant.

12. A vaccine according to claim 11, wherein [the]said adjuvant is an oil phase of an emulsion selected from the group consisting of a water-in-oil emulsion [or]and a double oil emulsion.

Note: in the originally filed claim set, two claims were numbered 13. Please amend the first claims 13 as follows:

13. A method for vaccinating a mammal against GnRH-I with a vaccine according to [claims]claim 10[-12].

14. A method for vaccinating a mammal according to claim 13[ or 14], wherein [the]said vaccine is administered in a single dose.

15. A vaccine according to [claims 10-12] claim 10 that is sufficiently active for administration in a single dose for the essential immunocastration of pigs.

16. A method to effect one or more reproductive or behavioral characteristics of a mammal, characterized in that said mammal is vaccinated in accordance with [claims]claim 13[-15].

17. A method for immunizing a mammal against GnRH,[ preferably GnRH-I],] comprising vaccinating the mammal with a vaccine according to claim 16.

- 18. A method to immunocastrate a pig, characterized in that said pig is vaccinated in accordance with claim 17 [ or 18].
- 19. Antibodies against GnRH-II obtainable by a method comprising a step wherein an immuneresponse is elicited to a peptide according to [claims]claim 1[-9].
  - 20. A vaccine against GnRH-II comprising a peptide according to [claims]claim 1[-

9]. -

- 21. Composition for the treatment of prostate cancer comprising a peptide according to [claims] 1[-9].
- 22. Use of a peptide according to [claims]claim 1[-9] in the preparation of a pharmaceutical composition.
- 23. Use of a peptide as defined in [claims]claim 1[-9] for the preparation of a medicament for the treatment of prostate cancer.
- 24. Method for the treatment of prostate cancer comprising administration of a suitable dose of a composition comprising a peptide that elicits an at least an immunogenic response against GnRH-II.

Attorney Docket: 4518US

Please renumber the second claim 13 as 25 and amend as follows: [13]25. A method according to claim 13, wherein [the]said vaccine is a selective vaccine for vaccination against GnRH-I.

Please add the following new claims:

The state of the s

A peptide according to claim 3 wherein said different amino acid is Ala.

A peptide according to claims 3 wherein said peptide is selected from the group consisting of:

SEQ ID NO: 5, SEQ ID NO: 6, and SEQ ID NO: 7.

A peptide according to claims 4 wherein said peptide is selected from the group 28. consisting of:

SEQ ID NO: 5, SEQ ID NO: 6, and SEQ ID NO: 7.

A peptide according to claims 1 that is multimerised. **29**.

A peptide according to claims 3 that is dimerised. 30.

A peptide according to claims 3 that is multimerised.

A peptide according to claims 4 that is dimerised.

A peptide according to claims 5 that is dimerised.

A vaccine comprising a peptide in accordance with claim 1.

A vaccine comprising a peptide in accordance with claim 3.

A vaccine comprising a peptide in accordance with claim 5.

A vaccine comprising a peptide in accordance with claim 6.

A vaccine comprising a peptide in accordance with claim 7.

V/

A vaccine comprising a peptide in accordance with claim 9.

A method for vaccinating a mammal against GnRH-I with a vaccine according to claim 11.

A method for vaccinating a mammal against GnRH-I with a vaccine according to claim 12.

A vaccine according to claim 11 that is sufficiently active for administration in a single dose for the essential immunocastration of pigs.

A vaccine according to claim 12 that is sufficiently active for administration in a single dose for the essential immunocastration of pigs.

A method to effect one or more reproductive or behavioral characteristics of a mammal, characterized in that said mammal is vaccinated in accordance with claim 14.

A method to effect one or more reproductive or behavioral characteristics of a  $\pi 2.$ mammal, characterized in that said mammal is vaccinated in accordance with claim 15.

Antibodies against GnRH-II obtainable by a method comprising a step wherein an immuneresponse is elicited to a peptide according to claim 3.

Antibodies against GnRH-II obtainable by a method comprising a step wherein an immuneresponse is elicited to a peptide according to claim 5.

Antibodies against GnRH-II obtainable by a method comprising a step wherein an immuneresponse is elicited to a peptide according to claim 6.

Antibodies against GnRH-II obtainable by a method comprising a step wherein an immuneresponse is elicited to a peptide according to claim 7.

Antibodies against GnRH-II obtainable by a method comprising a step wherein an immuneresponse is elicited to a peptide according to claim 9.

5 78.

A vaccine against GnRH-II comprising a peptide according to claim 5.

75 75.

Composition for the treatment of prostate cancer comprising a peptide according

to claim 5.

3 \$ 80.

Use of a peptide according to claim 5 in the preparation of a pharmaceutical

composition.

81. Use of a peptide as defined in claim 5 for the preparation of a medicament for the treatment of prostate cancer.
